DESCRIPTION

High-quality solid board for the production of custom packaging solutions for light- to heavy-duty transport packaging in the food and non-food sectors.

Because of the low material volume of solid board packaging, pallets, freight space, and transport space are utilized optimally, saving costs at every stage of product distribution.

JadeBoard® Duo Grey picks up where classic gray cardboard leaves off. Thanks to the lamination, basis weights of up to 1,200 g/m² can be achieved, resulting in compact strength.

This makes it ideal, for example, for the base of heavy-duty transport packaging.

APPLICATION

Cost-effective solid cardboard packaging solutions for versatile, high-performance, and sustainable shipping or retail packaging.

The general application recommendations are subject to technical testing of the specific cardboard grade.

SUITABLE FOR

- dry foods
- fatty foods

TECHNICAL SPECIFICATIONS

- Gram per square meter: 700 to 1200 g/m²
- Surface: uncoated, laminated
- Gluing: unglued
- Colors: gray

CERTIFICATION

- Certified for direct contact with dry and non-greasy foods
- FSC®
- Recyclable according to standard EN 13430
