

JADEKRAFT®

Kraft liner substitute with homogeneous brown kraft liner appearance for heavy packaging with highest strength requirements.

COVER PAPER

KRAFTLINER SUBSTITUTE

STRENGTH

DESCRIPTION

JadeKraft is a two-ply paper made from pulp and high-quality recycled paper, which gives it excellent strength properties. The smooth surface of JadeKraft® ensures easy processing and makes it ideal for printing. Nevertheless, a certain degree of roughness prevents stacked corrugated boxes from sliding during transport. As a substitute for kraft liner, it offers cost advantages over conventional kraft liner grades.

APPLICATION

Applications with the highest technical requirements in which kraftliner is used today. Particularly suitable for heavy packaging for industrial and consumer goods with high optical demands on a brown surface

SUITABLE FOR

- non-greasy foods
- dry foods

TECHNICAL SPECIFICATIONS

- Gram per square meter: 120 to 280 g/m²
- Surface: uncoated
- Gluing: glued COBB60
- Colors: brown

CERTIFICATION

- Certified for direct contact with dry and non-greasy foods
- FSC®
- Recyclable according to standard EN 13430
