SCRATCH PROTECTION

DESCRIPTION

Anti-slip coated paper or cardboard for all industrial areas. For the protection and stabilization of palletized goods. The slip angle of > 65 degrees makes Jade-Protec® Antiskid the best performing product on the market. Production and transport processes can be optimized considerably. Realisation of savings potentials through reduced use of stretch film.

USAGE

Interlayer for pallet stability in the packaging of foodstuffs, tissues, in beverage filling, metal processing, automotive industry, for dairies and bagging plants. Supplied as sheets for manual removal as well as for applications in fully automatic packing lines. With excellent flatness and very good separation for automatic processing. Supplied as a roll for all slitter rewinders.
